☎ 9730879127 | ✉ anujsuryawanshi28@gmail.com | 🌐 anujsuryawanshi | 📱 aannuuujj | 📍 Nagpur, India

Skills

Languages: Python, Java, JavaScript, TypeScript, C++

Frameworks & Libraries: Angular, Node.js, Express.js

Databases: MongoDB Atlas

Tools: Git, GitHub, Postman, Arduino IDE

Core Concepts: REST APIs, Authentication, Authorization, CRUD Operations, JWT, RBAC, Password Hashing, Database Integration

Work Experience

Tejstarter IT Solutions Pvt Ltd

2026 – Present

Software Developer Intern

Nagpur, India

- Contributed to the development of the RentShield platform using Angular and TypeScript.
- Implemented and enhanced authentication features including login, signup, password recovery, form validation, and role-based user interactions.
- Improved UI/UX by fixing frontend bugs, refining user flows, and enhancing validation feedback.
- Worked on property management modules by implementing property search functionality, routing, and property detail page integration.
- Configured frontend API services and environment-based backend integration, ensuring seamless communication with REST APIs.
- Collaborated with team members using Git and followed component-based architecture, modular development practices, and modern web application workflows.

Project Work

- **AI Career Copilot – Team Leader (GDG Agentic Premier League Hackathon):** Led a 4-member team in building a full-stack AI career guidance platform with resume analysis, voice-based mock interviews, career readiness scoring, and internship recommendations using Next.js, FastAPI, Supabase, and Anthropic Claude API. Implemented authentication with NextAuth.js and Google OAuth, and an analytics dashboard with Recharts. Coordinated planning, GitHub collaboration, and delivery.
- **Role-Based User Management API (May–Jun 2026):** Built a secure backend application using Node.js, Express.js, MongoDB Atlas, JWT, and bcryptjs. Implemented Role-Based Access Control (RBAC), authentication middleware, protected admin routes, user promotion, account blocking, and RESTful API architecture.
- **Notes App Backend (May–Jun 2026):** Developed a backend notes management system with secure JWT authentication and CRUD functionality. Implemented protected routes, MongoDB Atlas integration, and REST APIs for creating, updating, retrieving, and deleting notes.
- **User Authentication API (May–Jun 2026):** Built a secure authentication API using JWT and bcryptjs with user registration, login, password hashing, token generation, and protected routes.
- **Online Stock Prediction (May 2025):** Analyzed historical stock market data and implemented predictive logic using data preprocessing and trend analysis techniques. Worked on dataset handling, evaluation, and program logic in a team environment.

Education

Priyadarshini College of Engineering

2023 – 2026

B.Tech in Artificial Intelligence & Data Science

Nagpur, India

- Relevant Coursework: Object Oriented Programming, Databases, Discrete Maths, Data Structures and Algorithms, Operating Systems, Computer Networks, Machine Learning, Data Mining, Advanced Data Structures and Algorithms, Information Retrieval, Image Processing

Somayya Polytechnic

2021 – 2023

Diploma in Computer Science Engineering

Chandrapur, India

- Relevant Coursework: Programming (C/C++, Java), Software Engineering, Microprocessors and Embedded Systems, Mobile Application Development, Network & Information Security, Software Testing, Data Mining, Information Retrieval, Image Processing

Leadership & Achievements

- Led a 4-member team in the GDG Agentic Premier League Hackathon.
- Developed and published 5+ backend and full-stack projects on GitHub.
